

MAVOSPEC **LITE** Release Note

Firmware V 1.3.5 Available from: 05.2024

Timer for starting the measurement.

Changes in this version

- By long pressing the measurement button, a **timer** can now be started and the **start of the measurement will be delayed by 10 s.**

Firmware V 1.3.4 Available from: 08.2023

Only adjustment of the firmware number, due to a bug fix in the MAVOSPEC BASE firmware.

Changes in this version

- None

Firmware V 1.3.3 Available from: 12.2022

Bug fix for firmware version V 1.3.2.

Changes in this version

- The device no longer starts with the Data button when it is connected to the USB and thus no longer unexpectedly enters the bootloader. A supposed hanging of the device is eliminated.

Firmware V 1.3.2 Available from: 12.2021

This firmware version was delivered with the first MAVOSPEC LITE deliveries.
